GENERAL: Fusion Woven Fabric Repositionable is a highly conformable woven polyester fabric material for wide format printing applications. An acrylic microsphere repositionable adhesive is applied to the back side, with a 92# layflat, polycoated release liner. The printable surface is compatible with a variety aqueous wide format printing equipment. The inkjet receptive coating is water resistant and fast drying to high ink volumes, and exhibits exceptional UV resistance. Liquid overlaminates can be used on the surface if necessary.

Available in 24", 36" and 60" widths, on 2" cores.
